

## Biostatistics Review Certificate

To whom it may concern,

I, Mei Jiang, hereby certify that the statistical methods and analyses presented in the manuscript titled "Klebsiella pneumoniae infections after liver transplantation: drug resistance and distribution of pathogens, risk factors and influence on outcomes"(No. 91499) which have been submitted to the journal "World Journal of Hepatology" have been thoroughly reviewed and validated from a biostatistical perspective.

Details of the Biostatistics Review:

Statistical Methods:

The statistical methods employed in the study are appropriate for the research objectives.  
The choice of statistical tests and models aligns with the nature of the data.

Data Analysis:

The data analysis is conducted with accuracy and attention to detail. Proper statistical software and programming techniques are utilized.

Interpretation of Results:

The interpretation of statistical results is clear and logically follows from the analyses performed.  
The implications of the statistical findings are appropriately discussed.

I have expertise in biostatistics and have carefully reviewed the statistical components of the manuscript to ensure their accuracy and appropriateness. I am available for any further inquiries or clarifications regarding the statistical aspects of the manuscript.

Credentials:

Full Name: Mei Jiang

Title: Biostatistician

Affiliation: State Key Laboratory of Respiratory Disease, Guangzhou Institute of Respiratory Disease, The First Affiliated Hospital of Guangzhou Medical University
