Title: Occupational exposures and colorectal cancers: a quantitative overview of epidemiological evidence

Author: Enrico Oddone, Carlo Modonesi, Gemma Gatta

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 9233

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

- (1) The text in Discussion, under the heading "Industrial branches and specific exposure" was considerably shortened, from about 880 words to 448 words and was relocated to the Introduction.
- (2) The last sentence in Conclusions was relocated to the Discussion since it was not an inference from the results, but we think that it is a cornerstone of our article content and a plea for prevention.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

A handwritten signature in black ink, appearing to be 'Enrico Oddone'.
