Name of Journal: World Journal of Gastroenterology

ESPS Manuscript NO: 925

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) For Asian experience that authors mentioned in the first paragraph of discussion, references are needed.

re: 1. References in this paragraph have been added.

(2) Learning curve is not simple point which it reflects short procedure time. It has to be time point when overall procedure-related issues become stable. Procedure time, complication, and other related issues would be better to be shown as figure.

re:2. The learning curve was explained as a related to speed of procedure, complete resection rate and complication rate. Figures 4 and 5 have been attached.

(3) Reduce the number of tables.

re: 3. The number of tables has been reduced. The data from tables 2, 3, 4 have been put together into table 2.

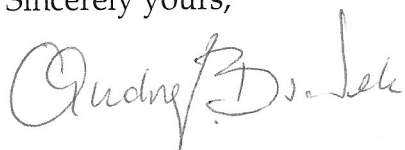

4) Some words used in manuscript are hard to be read. Consider grammatical editing.

re:4. The manuscript has been edited by professionals.

3 References and typesetting were corrected
