SPECIFIC COMMENTS TO AUTHORS

This reviewer think that the theme of this article is interesting, but popular in the area other than China globally. In this regards, this paper is valuable. However, this reviewer would like to give some comments on this paper. Major concerns: 1. Fist of all, the world journal of gastroenterology is not suitable to this article. The world journal of cardiology would be suitable for target readers, because the novel treatment such as Yangxinshi Tablet for chronic cardiac failure is being explored in the world. 2. Please add the information about left ventricular function and type of chronic heart failure (HF_rRF/HF_pEF etc.) and baseline cardiac disease (ischemic/non ischemic) in each adopted study in Table 1. By this information readers will be able to know which patients were treated with Yangxinshi Tablet in the review and met-analysis. 3. To know the effects of Yangxinshi Tablet on cardiac failure, it would be crucial to consider the use the guidelines-based treatment (β blocker, ACEI/ARB, MRA, SGTT2I, ARNI etc.) in all patients. Please show the prescription rate and adherence to the guidelines-based treatments in the adopted studies. 4. The treatment strategy for HF_rEF has been almost established. Meanwhile, the beneficial drugs for HF_pEF is scarce besides SGLT2i and

ARNI. Thus, readers may want to know the effects of Yangxinshi Tablet on HFpEF. Please show the data and or discuss about this theme. 5. In Page 11 Lines 1-3 Left ventricular diastolic function can not be evaluated by LVEDD, LVESD, or LVEF. Thus, this description is incorrect. Minor concerns: 1. Page 4: Line 3 from the bottom: TCM Please show the full spelling at the first presentation for TCM. 2. Page 4 Line 3 from the bottom to Page 5 Line 5 Please add the references for this sentence. 3. Please add the Chinese name in Chinese letters for Yangxinshi Tablet, Qi, Yang. 4. Page 6 the boeom line In each exercise→Please explain these words. I cannot understand them. 5. Reference [20] Is the data incomplete? 6. Please explain the missing data in male age in Table 1.
