Subject: Re: permission to use ACS management algorithm

Dear Venkat

Sure. you can use the management algorithm as the paper is Open Access

You must mention the FULL original reference and the fact that permission was granted by WSACS, the abdominal compartment society (www.wsacs.org)

Best regards

Manu

Onderwerp: permission to use ACS management algorithm

Dr. Kirkpatrick,

I would be grateful if you could give me permission to use the Abdominal compartment syndrome management algorithm (Intensive Care Med 2013) in a review article that I am writing for World society of Gastroenterology online journal. I will use the appropriate citation and reference.

Thank you,
Venkat Rajasurya/Salim Surani

Dear Dr. Rogers,
I would be grateful if you could provide permission to use the image of bladder pressure monitoring equipment (chest Jan 2018) for the review article I am writing for World Journal of Gastroenterology. Thank you very much!

Regards,
Venkat

Re: Abdominal Compartment Syndrome: Often Overlooked Conditions in Medical Intensive Care Units!

Dear Sir/Madam:

Attached, please find the revised manuscript and the suggested questions answered and attached. We like to thank the editorial staff for their time and patience.

Please let us know with any questions.

Regards

Salim Surani, MD

Special comments from the editor:

The following file/information are missing. Please provide.

1. Copyright-License-Agreement, please provide all pages, not just the signature page.

Response: Thanks for pointing out. Revised Copyright agreement is attached..

2. Upload an editable Figure 1. For example in the Powerpoint file format.

Response: Editable powerpoint format has been attached.

3. Proof of permission has been obtained for reuse-Table 1, Figure(s) 2-4 e.g. copyright letter, email communications.

Response: The permissions have been attached.

4. Update references, superscript should follow immediately authors name not at the end of the sentence. e.g. page 5 Kimball. Please update all in your paper.

Response: The references have been modified as suggested.
