**Closure techniques in exposed endoscopic full-thickness resection: Overview and future perspectives in the endoscopic suturing era**

Granata A *et al.* Closure techniques in exposed endoscopic full-thickness resection

Antonino Granata, Alberto Martino, Dario Ligresti, Francesco Paolo Zito, Michele Amata, Giovanni Lombardi, Mario Traina

### Abstract

Exposed endoscopic full-thickness resection (EFTR) without laparoscopic assistance is a minimally invasive natural orifice transluminal endoscopic surgery technique that is emerging as a promising effective and safe alternative to surgery for the treatment of muscularis propria-originating gastric submucosal tumors. To date, various techniques
