COMMENTS TO AUTHORS

Dear Authors, this is a well written manuscript about an highly interesting topic. Although the most recently published paper of your group about pancreatic cancer is similar, this new manuscript about BTC is of value. Please correct introduction as Klatskin Tumors are also extrahepatic cc. And shortly discuss also the value of surgery for this malignancy. Please revise also your conclusion and change some words to delete misunderstanding. Please describe more in detail your recommendation for individualised chemotherapy. What is your definition of advanced tumor in this specific situation? Metastatic disease or local advanced tumor (T3/4 and/or Klatskin Type III/IV)? Sincerely
Reviewer
