

June 20, 14

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 11342-review.docx).

Title: Multipurpose use of the Over-the-Scope-Clip system: Swiss experience in a tertiary center

Authors: Sulz Michael Christian, Bertolini Reto, Frei Remus, Semadeni Gian-Marco, Borovicka Jan, Meyenberger Christa

Name of Journal: World Journal of Gastroenterology

ESPS Manuscript NO: 11342

The manuscript has been improved according to the suggestions of reviewers:

1. Format has been updated according to your e-mail.
2. Revision has been made according to the suggestions of the reviewer. The changes have been colored and made by word with track changes/correction mode.

(1) In methods section we explained the technique for OTSC deployment

(2) In results and discussion sections we mentioned the absolute numbers, relative frequencies (3/10 (33%)). For reasons of clarity, we haven't added the absolute numbers every time in the disussion section.

(3) We have added information about the simple descriptive statistics.

(4) The title of the tables have been redacted according to the content and be more explicit.

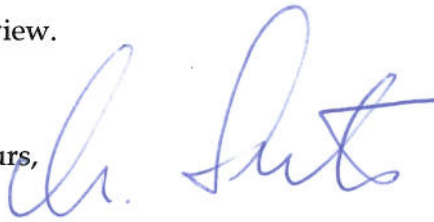

(5) The figure 1 has been changed in bars.

(6) We acknowledged the editor's comment to advise us to add the digestion key words in the title. We added 'bear claw' and 'in the gastrointestinal tract' to give the reader the right context where the OTSC clip is used. However, we did not add keywords like perforation, leckage, fistulae, because we wanted to subsume the variaty of indications under the expression 'multipurpose use of'. Furthermore with the added words the title is longer than 12 words. If the length of the title is a problem, please do not hesitate and choose the former title.

3. References and typesetting were corrected.

Thank you again for publishing our manuscript in the World Journal of Gastroenterology after your thorough review.

Sincerely yours,

A handwritten signature in blue ink, appearing to read 'M. Sulz', written over the 'Sincerely yours,' text.

Michael Christian Sulz, MD,

Department of Gastroenterology and Hepatology,
