

Answering Reviewer

The manuscript was revised according to the reviewer comments and a new section “interaction between the GI NES and intestinal microbiota” was added at pages 7 and 8.

Answering Editor

2. The documents required for funding are in Norwegian. To translate them is unnecessary time consuming task. We chose to remove this part as required by the editor.

3. The abstract is revised to be over 200 words.

4. Audio core tip is provided.

5. The figures were provided as PPT formate. Figures 2 and 6 are reproduction by permission from the publishers and authors and the labels can not be edited further. Figures 1, 7, 8, and 9 are illustrations made by 2 famous Norwegian illustrators (Silvia Karlsen, and Ingjerd M Hjelmeland). The placing and the size of labeling is a part of the illustrations and should not be subjected to further changes.
