Impact of homeobox genes in gastrointestinal cancer

Joo MK *et al.* Homeobox gene in GI cancer

Moon Kyung Joo, Jong-Jae Park, Hoon Jai Chun

## Abstract

Homeobox genes, including *HOX* and non-*HOX* genes, have been identified to be expressed aberrantly in solid tumors. In gastrointestinal (GI) cancers, most studies have focused on the function of non-*HOX* genes including caudal-related homeobox transcription factor 1 (CDX1) and CDX2. CDX2 is a crucial factor in the development of pre-cancerous lesions such as Barrett's esophagus or intestinal metaplasia in the
