

Animal care and use statement: Health Status of mice and Procedures were documented daily on the University of Kentucky Institution Animal Care and Use Committee Standard Operating Procedure (UK IACUC SOP-102) Post-Operative Evaluation form. Mice were housed in individual cages with a 10h/14h dark/light reversed cycle to accommodate behavioral test during their active dark period. Mice were allowed free access to food and water ad libitum, except 2 hours before and during behavioral testing.
