COMMENTS TO AUTHORS

The length of the manuscript is excessive and I think it is possible to reduce. To improve the manuscript for the readers, authors should go into the detail in the conclusion section.

COMMENTS TO AUTHORS

This is an interesting article, but is too long. I suggested that it should be brevity before publication.

COMMENTS TO AUTHORS

The authors have presented an up to date review on role of minimally invasive surgery in the management of inflammatory bowel disease. The review does cover the subject extensively with evidences on the contemporary surgical practice of the management of inflammatory bowel disease, critically analyses the advantages and disadvantages of each modality of treatment and highlights the future directions. In essence, this is a useful article for the trainees and practicing surgeons and is worth considering for publication in the World Journal of Gastroenterology. I would suggest the authors to replace the word "Minimal invasive....." with "Minimally invasive...." on the title of the paper.
