### COMMENTS TO AUTHORS

An interesting article. Comments: 1. I think that the endoscopic description of the gastric mucosa appearance is not necessary. 2. I suggest describe the type of endoscopic mucosal resection performed. 3. in case 3: Why not USE was performed prior to EMR?

### COMMENTS TO AUTHORS

This is an interesting article on the rare tumor of esophagus. The experiments are well designed and described in detail. I suggest to supplement references with some new literature item on the topics, such as: 1. Jamshidi F. et al. Cancer genomics: why rare is valuable. J Mol Med 2015; 93:369-381 2. Qian T. et al. Collision tumor of the esophagus: report of a case with mixed squamous cell carcinoma and gastrointestinal stromal tumor. Int J Clin Exp Pathol 2014; 7: 1206-1211 The text contains also a few grammar mistakes. It would be a good idea to have the paper read and corrected by a native speaking specialist. After the revision following the comments above, I will be able to recommend this article for publication in World Journal of Gastrointestinal Oncology.
