SPECIFIC COMMENTS TO AUTHORS

English of manuscript is erratic to read and disastrous, needs Professional editing
 My sincerere request , do not waste precious time of reviewers by writing Manuscripts
 in this terrible English Abstract line 2 "What is this conveying "Gastrointestinal
 stromal tumor (GIST) is the most important and common" "was admitted to the
 hospital ' where are trhen patients admitted ? "was flat and soft without tenderness "
 Heard this term "Exploratory laparoscopy " first time Exploratory laparoscopy is
 effective for both diagnosis and treatment ,how is malignancy diagnosed on that ?
 Core Tip is whole investigations Case Presentation ...because of a pelvic mass...
 irritable terms The patient denied smoking and drinking. One sister and one brother
 had been diagnosed with NF1. is this way of writing

SPECIFIC COMMENTS TO AUTHORS

Yao MQ et al. experienced an important representative case of neurofibromatosis type I-associated gastrointestinal stromal tumors in small intestine. I have a few points to be worried and the authors should address the points below. Minor points: 1) The authors should describe whether there were any GISTs in other parts of small intestine. 2) The authors should describe why they did not perform FDG-PET, capsule endoscopy, or balloon-assisted enteroscopy before surgery. 3) If multiple GISTs develop again, there is a risk of short bowel syndrome after resecting all GISTs by surgery. The authors should describe how to follow-up and what they can do for newly developed GISTs in the future. 4) The authors should delete all traces in red of their own revisions before submitting the manuscript.

SPECIFIC COMMENTS TO AUTHORS

he association between neurofibromatosis 1 and GIST is well described and therefore the case does not highlight a novel finding.
