**COMMENTS TO AUTHORS**

Comments to the manuscript entitled: Pancreatic perivascular epithelioid cell tumor: a case report with clinic pathological feature and literature review. From the authors: Jiang H et al. The manuscript is properly presented and present a case report of Pancreatic Perivascular Epithelioid Cell Tumor. Comments It is an article of great importance. However, the following recommendations can help to improve the presentation of the manuscript: It is important that researchers indicate the name of the Ethics Committee approved the study and if the patient was treated according to the provisions of the Helsinki criteria to conduct research involving human subjects. In the introduction, it is recommended that the authors of this manuscript present in detail the epidemiological aspects of this type of tumor. Frequency by geographic location, sex, age, clinical manifestations and predisposing factors, if there is a hereditary predisposition, it would be appropriate to describe it. The authors show excellent methodology to distinguish the histopathological tumor lineage. However, because it is one case report, more information about the clinical and laboratory aspects of the patient is needed. It is recommended described, what is the

status of the patient clinical follow-up? , and what is the prognosis of the patients with this type of tumor?. It is advisable to explain more clearly and in detail the contents of all figures into the text in the results section. Page 8, first paragraph write the citation of Nagata et al. In the discussion section, it is recommended that the authors explain in more detail, what is the role of female sex hormones in the PEComas behavior? In Table 1, note at the foot of the table the meaning of the acronyms used. The title of Table 1 is very general, it is recommended to change it to a more descriptive title of the content of the table. It is also advisable to write a foot of the table. It is recommended to present a conclusion of the case report.

### COMMENTS TO AUTHORS

This is a well-written case report of a rare tumour of the pancreas. The case is presented in much detail and with adequate radiologic, histologic and cytological material. The literature review is also comprehensive. I would like to see a picture of tumour on EUS instead of so many histological slides.
