COMMENTS TO AUTHORS

This manuscript provides an overview on diagnostic imaging and radiological interventions for hilar cholangiocarcinoma. Some minor comments: Cover letter: The first sentence is unclear: "We would like to submit an invited review on skeletal dysplasias titled "Imaging and Interventions in Hilar Cholangiocarcinoma" to your esteemed journal." Introduction: "Klatskin's tumor" > Klatskin tumor (modern medical dictionaries prefer non-possessive styling of eponyms). "Ultrasonography" section: "Administration of USG contrast agents improves detection of primary lesion to 100% [20]." Please rephrase this sentence: It should become clearer, that this is not a general statement, but the result of one study. Figure 4A: "enhancing mass" > enhancing mass. Figure 12C: Please describe both arrows (the black one and the white one) in the figure legend. This manuscript is well readable; however, some language polishing would be desirable.
