## COMMENTS TO AUTHORS

The manuscript is very interesting. I have only few suggestions: 1) It is too long: I believe that a significant shortening could be obtained by reduction of paragraphs on clinical presentation, lithotripsy, and emerging surgical techniques. 2) Too much abbreviations sometimes make difficult the reading 3) As reader I need a more critical appraisal of the Literature's messages 4) As reader I need also a brief list of the evidence's messages (also in a table)
