## COMMENTS TO AUTHORS

This invited review written by Dr. Arturo Panduro has perfectly gone through the current knowledge of genomic medicine and nutrition, and discussed future perspective. The author elucidated some of mechanisms that contribute to obesity and nonalcoholic steatohepatitis, and gave an intervention strategy for the prevention and treatment based on a regionalized genome-based diet. The manuscript comprehensively reviewed key articles addressed on this issue and well organized them. It was appropriately subdivided in sub-titles. It should be of large interest for the readers of WJG, and I strongly recommend it to be published in the present form without any delay. Very Good Job, Congratulations !

## COMMENTS TO AUTHORS

In the review study, the authors summerized the recent results of the research for the obesity that affects liver health, and provide the rationale of an intervention strategy for the prevention and treatment of obesity and nonalcoholic steatohepatitis. The authors called it as "genome-based nutrition". This provides a new conception for the prevention and treatment of obesity and nonalcoholic steatohepatitis.
