COMMENTS TO AUTHORS

I think the article contains useful information on Furazolidone resistance in H pylori. However, I have the following suggestions; 1. Shorten the article focusing only on the issue at hand. 2. Reduce the number of references to those that are shown in the table. 3. Have a language editing done since the manuscript requires extensive revision from this aspect.

COMMENTS TO AUTHORS

Dear Author, I recommend to focus on the factors that are associated with antibiotic resistance (including Furazolidone) in H.pylori eradication therapy. In this letter only few mutations are addressed.

COMMENTS TO AUTHORS

1. The authors reviewed the resistance rates of H.pylori to furazolidone, which was a beneficial supplement to the manuscript of Arslanet al.Could the authors offer some information about the detection of furazolidone resistance? 2. The authors mentioned recently observed mutations contributing in levofloxacin resistance.Could the authors introduce the incidence of these mutations? 3. The language needs to be refined.
