Can probiotics benefit children with autism spectrum disorders?

 Navarro F *et al.* Probiotics for children with autism

Fernando Navarro, Yuying Liu, Jon Marc Rhoads

Abstract

Children with autism are commonly affected by gastrointestinal problems such as abdominal pain, constipation and diarrhea. In recent years, there has been a growing interest in the use of probiotics in this population, as it hypothetically may help to improve bowel habits and the behavioral and social functioning of these individuals. The gut microbiome plays an important role in the pathophysiology of organic as well as functional gastrointestinal disorders. Microbial modification with the use of
