Laparoscopic splenectomy for splenic littoral cell angoma

Yun-Qiang Cai, Xing Wang, Xun Ran, Xu-Bao Liu, Bing Peng

Abstract

AIM: To establish the safety and feasibility of laparoscopic splenectomy (LS) for littoral cell angoma (LCA).

METHODS: From September 2003 to November 2013, 27 patients were diagnosed with LCA in our institution. These patients were divided into two groups based on operative procedure: LS (13 cases, Group 1) and open
