

**Answering Reviewer:**

Thank you very much for the good comments

1. We add information about ESR rate and CRP level after treatment and the point of their normalization time. (First sentence of "OUTCOME AND FOLLOW-UP" section.)
2. We added the ICD-10 code for every diagnosis of this patient. (In the section of "History of past illness" and "FINAL DIAGNOSIS")

P.S. The References were modified by the amazing "web auto-analyser".

Please see the manuscript. Thanks.
