COMMENTS TO AUTHORS

Dr. Jansen and colleagues have presented an highly interesting case report reporting on a acute severe tonsillitis caused by HSV-1 infection/reactivation. Overall, the manuscript is well performed and written and yet concise in its content. Actually there is no criticism with regard to the content and sufficiency of the manuscript. However, as a minor comment, there is an old case report from Wat et al. 1994 (Mayo Clin Proc. 69:269-71) describing a topic close to the presented case report. This article could be briefly discussed.
