Dear Editor, Li-Jun Cui,
Science Editor, Editorial Office
Baishideng Publishing Group Inc
World Journal of Hepatology

I am writing regard to the article entitled “**Morphological and biochemical effects of weekend alcohol consumption in rats. Role of concentration and gender**” and note that the statistical methods applied of this study were Student’s T-test and the one way-ANOVA test, and the Student-Newman-Keuls method as an post hoc evaluation for multiple comparisons. The mentioned analyses were reviewed by Tomás Fregoso Aguilar, PhD, member of the academy of physiology from National School of Biological Sciences in National Polytechnic Institute. I declare that the statistics of the above mentioned article were checked.

Please feel free to contact me if you have any questions.

Respectfully

Tomás Fregoso Aguilar, PhD.
