

Dear Editors,

Thank you for accepting our manuscript with revisions. We hope that you are satisfied with all of our revisions. We have addressed all the points made by the editors, and have submitted a copy with track changes, in which we have inserted comments at the relevant additions. We have also submitted a clean version of the document. We have accepted all requested changes, including converting this into a minireview. We would be happy to add more changes if requested by the editors/reviewers.

The relevant changes we have made include: amending all the references to meet the journal requirements, addition of all the relevant sections at the beginning of the manuscript (author/addresses, author contributions, ORCID ID's, conflict of interest, open access, corresponding author, key words, copyright, Core tip, abbreviation frame), and the following requested changes:

1. To highlight the innovation of your article compared to those of previously similar publications. **This has been addressed in the introduction section of the manuscript.** 2. To add the following elements. The comparison of detailed advantages and disadvantages between LIRADS Treatment Response Assessment and other treatment response classification systems. **This has been addressed throughout the manuscript with multiple additional statements made.** 3. Adding an abbreviation frame will make it more readable. **This has been added.** 4. Language polishing is recommended. **The manuscript has been re-reviewed by multiple individuals and language polishing appears ok.**
2. To highlight the innovation of your article compared to those of previously similar publications. **This has been addressed in the introduction section of the manuscript.** Language polishing is recommended. **The entire document has been reviewed by multiple authors and language polishing has been made.**
3. 5 Issues raised: (1) I found no "Author contribution" section. Please provide the author contributions; **This has been added to the manuscript** (2) Please provide the original figure documents. Please prepare and arrange the figures using

PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor; both original figure documents and the power point have been provided (3) I found the authors did not add the PMID and DOI in the reference list. Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references. Please revise throughout; this has been revised. and (4) I have changed the manuscript type “review” to “minireview”. The authors have reviewed the on-line manual as to how to change this manuscript type to mini-review, and have followed all the steps as per the manual.
