COMMENTS TO AUTHORS

This manuscript reports on the early diagnosis and the earlier initiation of recombinant thrombomodulin. The authors may consider the following minor editorial suggestions to revise this manuscript: 1. Please use gastrointestinal or GI surgery in stead of digestive surgery throughout the manuscript. 2. Please describe the criterium for the severe renal failure for the justification to reduce the dosing of recomodulin. 3. On Table 1, Heparine derivative should be described such as unfractionated heparin or low molecular weight heparins. 4. How does the DIC scores reported in this manuscript compare with the ISTH DIC scores? 5. Please expand the legends of the figures to be more descriptive of the data provided. 6. Please check the entire manuscript for English and the use of abbreviations.
