COMMENTS

COMMENTS TO AUTHORS:

Thank you for your presentation a rare case report with great significance, and let us know that gastro-intestinal duplication is a cause of obscure gastro-intestinal bleeding. I think an emergency ileo-colonoscopy and/ or angiography should be a first-line diagnostic choice after early hemodynamic stability.

COMMENTS

COMMENTS TO AUTHORS:

some more details of therapy would be interesting: dosis of PPI? Extent of colonic resection? laparotomy without suspicion of a bleeding source and performing 3 enterostomies may be an alternative only in desparate cases, as the chance for relap is very high
