### COMMENTS TO AUTHORS

Dear Authors, the manuscript is well structured, comprehensive and analyzes in detail the aspects to be taken into account in the management and treatment of anastomotic leakage after colonic resection. I think there are no major remarks to make to your work; a single thing I would bring to your attention: - the section entitled "Integrated etiology" is a bit confusing, too many are the data that the authors point out in a few sentences, and this makes this section less clear with regard to work in general, so I think that should be rephrased.
