Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 2997-review.doc).

Title: Idiopathic chronic ulcerative enteritis with perforation and recurrent bleeding: A case report

Author: Xia Gao, Zhen-Jun Wang

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 2997

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated.

2 Revision has been made according to the suggestions of the reviewer.

(1) Please add a CT image of the abdomen before surgery.

We added "Figure 3", two abdominal CT images (A: Horizontal slice; B: Coronal slice.) of the patient before surgery in the case report. The abdominal CT showed mild intestinal dilatation and wall thickening in the terminal ileum (marked with black arrow), and moderate ascites in the abdominal cavity.

(2) This case should be shortened.

We abridged the description of abdominal CT and deleted some narration parts of treatment about the pneumonia before the operation.

3 References and typesetting were corrected.

4 Size of figures were adjusted according to the requirement. Black arrows were added to the CT figures. Both revisions were made by Photoshop.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,
