## COMMENTS TO AUTHORS

This review is very well written and interesting to read. However, there are a few English errors, which should be corrected for final publication. Please explain in detail “other factors” in Figure 8 in the text.

## COMMENTS TO AUTHORS

This review is summarizing the progression of H. pylori gastritis and it's high risk of causing cancer. However, the title of this review is "Atypical Malgun cell change: critical premalignant lesion representing high risk gastritis". The central point should be AMC, however the content did not focus on the AMC. Either the title or the content should be adjusted to match each other. In addition, the references cited in this review is too old, which didn't reflect that newest progress on AMC.
