

Response to reviewer's comments

Reviewer 1.

This manuscript systematically reviewed a very rare complication of gastrosplenic fistula (GSF) occurring in lymphomas. The review analyzed the current literature regarding the clinicopathologic/radiologic features, treatment, and outcome of GSF. It therefore provides useful recording to achieve of the disease. Please add the size information of each lymphoma if available to the table 1.

AUTHOR RESPONSE

#R1-1. Thank you very much for your kind comments. We added the size information of lymphoma in the Table 1.

Reviewer 2.

This systematic review provides an overview and spectrum of GSF occurring in lymphomas covering the clinicopathologic features, radiologic features, treatment, and outcome. This information will be helpful for physicians so that they can become aware of this rare disease entity. Minor language polishing.

AUTHOR RESPONSE

#R2-1. Thank you very much for your kind comments. We checked through the manuscript and corrected some typos and errors.
