SPECIFIC COMMENTS TO AUTHORS

The authors have presented an interesting case of bronchogenic cyst. I have following comments for the authors: 1. How is it possible that the patient noted abdominal mass for one week and physical examination is normal? Please clarify. 2. Was laparoscopic surgery i.e. diagnostic laparoscopy performed? If not why? 3. How much length of

SPECIFIC COMMENTS TO AUTHORS

This is correctly written paper and my criticism is minor. In the INTRODUCTION "Bronchogenic cysts have been reported in the mediastinum (1), lung (2), heart (3)..." and in the DISCUSSION "Bronchogenic cysts have frequently been reported in the mediastinum (1), lung (2), heart (3)..." There is the same allegation and no need to repeat

the the same references. Congratulations, good work.
