Cone beam computed tomography aided diagnosis and treatment of endodontic cases: Critical analysis

Funda Yılmaz, Kıvanç Kamburoglu, Naz Yakar Yeta, Meltem Dartar Öztan

### Abstract

Although intraoral radiographs still remain <sup>7</sup>the imaging method of choice for the evaluation of endodontic patients, in recent years, the utilization of CBCT in endodontics showed a significant jump. This case series presentation shows the importance of CBCT aided diagnosis and treatment of complex endodontic cases such as; root resorption, missed extra canal, fusion, oblique root fracture, non-diagnosed periodontal pathology, and horizontal root
