Management of patients with hepatic metastases from ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6152559>

Neuroendocrine tumors have a disposition toward metastasis to the liver. A range of treatment modalities for neuroendocrine liver metastases is available in the clinical arena, the indications for which depend on tumor characteristics such as patterns of metastasis...

Therapeutic strategies for neuroendocrine liver metastases ...

<https://acsjournals.onlinelibrary.wiley.com/doi/full/10.1002/cncr.28760>

Liver resection should be considered as the treatment of first choice for patients who are fit to undergo hepatic resection for grade 1 or 2 LMs and have no extrahepatic disease. Those who have extrahepatic lesions also may be considered if their tumor burden is entirely resectable. A complete tumor resection should be anticipated.
