COMMENTS TO AUTHORS

Dear Editor, Bencini et al presented a review title as " MINIINVASIVE SURGICAL APPROACH TO PANCREATIC MALIGNANCIES" The authors were well summarized the literature and discussed. This topic is a very important, and has many lack of well literature. They were discussed the all minimal invasive methods of the surgery. I think this manuscript may be publish. Many thanks...

COMMENTS TO AUTHORS

In this review article, the authors summarized published data in mini-invasive surgery (laparoscopic and robotic operations) in pancreatic cancer. The manuscript provides updated information in this topic to readers. There are some reservations about the study: 1 As published data cited in this manuscript were heterozygous (including original and review articles), the power of the conclusion was weak. 2 In conclusion, it is suggested to give an explanation to the controversial results among studies. Are there confounding factors (such as experience, facilities, condition of the hospitals)? 3 English needs polishing.
