### COMMENTS TO AUTHORS

Well written paper. However, it looks more like a book chapter than a scientific paper. I would recommend authors to create a Table summarizing findings of most significant papers on this topic (top 10 papers). I would encourage authors to clearly present their favorite approach to this complex issue of orthopedics (i.e. Authors' preferred option). Provide a new Figure "Treatment algorithm". Pre operative images of different valgus knee may be of use. Images of SOO valgus knee classification would be of use. Authors should clarify their search strategy and how they selected the 67 refs. Complications of treatment: expand. Contradictions of treatment: expand.
