SPECIFIC COMMENTS TO AUTHORS

The case report presented for publication is very interesting and well presented. An extremely rare case of hypoplasia of bilateral cruciate ligaments is described. Abstract is well written. In the introduction section authors give a brief and systematic information

about this pathology. The case report is outlined and well illustrated. In the discussion, the authors discussing the reported case with the balance of available literature data, presented an overview of the literature. This is extremely useful and valuable for further scientific research. The authors have formed a clear and logical conclusion. In conclusion, this case report is interesting and expands the available literature.
