<input checked="" type="checkbox"/> Grade B: Very good	<input type="checkbox"/> Grade B: Minor language polishing	<input type="checkbox"/> High priority for publication
<input type="checkbox"/> Grade C: Good	<input type="checkbox"/> Grade C: A great deal of language polishing	<input type="checkbox"/> Revision
<input type="checkbox"/> Grade D: Fair	<input type="checkbox"/> Grade D: Rejected	<input type="checkbox"/> Rejection

### JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

This manuscript presents a review on the potential role of several biomarkers (donor specific anti-HLA antibody, B lymphocyte stimulator, intracellular adenosine triphosphate, etc.) in kidney transplantation. Some of these new biomarkers have a real potential to be used in clinical practice in aspects such as early detection of allograft dysfunction or better immunosuppressive schedules. The review is appropriate and adequately written, and the authors have adequately answered the reviewers' concerns.
