1 Middle East respiratory syndrome coronavirus disease is Rare in Children: An update from Saudi Arabia

Jaffar A Al-Tawfiq, Rana F Kattan, Ziad A Memish

Abstract

2 Aim: The Middle East respiratory syndrome-coronavirus (MERS-CoV) was first discovered in 2012 and since then the number of pediatric cases remains low. In this study, we summarize the reported MERS-CoV cases, the associated clinical presentations and the outcomes.

METHODS:

9 We searched the Saudi Ministry of Health website, the World Health Organization website, and the Flutracker website. We also searched MEDLINE and PubMed for the keywords: 1 Middle East Respiratory Syndrome-coronavirus, MERS-CoV in combination with pediatric, children, childhood, infancy and pregnancy from the initial discovery of the virus in 2012 to 2016. The retrieved articles were also read to further find other articles. Relevant data were placed into an excel sheet and analyzed accordingly.
