Hepatic encephalopathy with status epileptics: A case report

<https://www.researchgate.net/publication/7192699...>

This case of focal status epilepticus due to hepatic encephalopathy, with long-lasting deficit despite liver transplantation, encourages rapid therapy for hepatic encephalopathy. View Show abstract

Complex partial non-convulsive status epilepticus ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3560269>

Dec 17, 2012 · Hepatic encephalopathy is usually suspected in patients who are cirrhotic with neuropsychiatric manifestations. We present a case of suspected hepatic encephalopathy that did not respond to standard empiric therapy and was eventually diagnosed as non-convulsive status epilepticus of complex partial type.

Nonconvulsive Status Epilepticus in Hepatic Encephalopathy ...

<https://westjem.com/case-report/nonconvulsive-status-epilepticus-in-hepatic...> ▾

Nov 22, 2011 · We discuss a case of a 64-year-old male with a history of liver failure presenting with altered mental status, initially diagnosed with hepatic encephalopathy but ultimately diagnosed with nonconvulsive status epilepticus (NCSE) by electroencephalogram (EEG). NCSE is a difficult diagnosis to make, given no clear consensus on diagnostic criteria. Especially in the intensive care ...

Nonconvulsive Status Epilepticus in Hepatic Encephalopathy

<https://www.researchgate.net/publication/221728408...>

Case summary: A 38-year-old man with a history of alcoholic liver cirrhosis presented with altered mental status; the initial diagnosis was hepatic encephalopathy.

[Hepatic encephalopathy with status epileptics: A case report](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4124362)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4124362>

Mar 21, 2006 · Although, according to some reports, the incidence of seizures in patients with hepatic encephalopathy is unknown, reports of epileptic seizures in patients with hepatic encephalopathy during the clinical course are very rare, but not in the terminal stage of liver cirrhosis[2-4]. We present a rare and interesting case of a 62-year-old male with hepatic encephalopathy with status epilepticus accompanying **decompensated liver cirrhosis**.

[Status epilepticus as a manifestation of hepatic ...](https://onlinelibrary.wiley.com/doi/abs/10.1034/j.1600-0404.2003.02092.x)

<https://onlinelibrary.wiley.com/doi/abs/10.1034/j.1600-0404.2003.02092.x>

Results – **Status epilepticus** was refractory to continuous antiepileptic treatment. However, it was resolved after 24-h therapy with lactulose. Blood NH₃ levels were simultaneously normalized with clinical improvement. Conclusions – We consider the **status epilepticus** of our patient to be a rare **manifestation of hepatic encephalopathy**.

Status epilepticus

Status epilepticus is a single seizure lasting more than five minutes or two or more seizures within a five-minute period without the person returning to normal between them. Previous definitions used a 30-minute time limit. The seizures can be of the tonic-clonic type, with a regular pattern of contraction and extension of the arms and legs, or of types that do not involve contractions, such as absence seizures or complex partial seizures. Status epilepticus is a life-threatening medical emergency, particularly if treatment is delayed.
