Rare complication: ¹ **Tapia's syndrome following shoulder surgery** under
endotracheal general anesthesia

Eda Şimşek, İlker Eren,

¹ Abstract

¹ **Tapia's Syndrome** is a rare disorder, characterized with paralysis of extracranial part of Nervus Vagus and Nervus Hypoglossus, effecting the ipsilateral vocal cord and the tongue. This complication is usually related to intubation and head positioning during surgery. In this study, we report ³ a case with **Tapia's Syndrome** under general anesthesia following orthopaedic shoulder instability surgery. Patient recovered as
