### SPECIFIC COMMENTS TO AUTHORS

This is an interesting and well-designed observational study on efficacy of HARRT regimens, i.e., switching from FDC to MDT. The manuscript is well-organized and well-written with adequate title, abstract, key words. The background description is

**https://**www.wjgnet.com

adequate as well except that more descriptions on kinds of FDCs and MTRs and differences between the two categories would be very helpful to the broad readers. The selected research methods were standard and well-justified. The results were presented clearly with adequate biostatistics. The presented information would be valuable to patient care and HAART management. minor edits: Key words - HAAR (missing "T")  
Page 11, the last sentence of the 1st paragraph was confusing.
