<input type="checkbox"/> Grade D (Fair)	<input type="checkbox"/> Grade D: rejected	BPG Search:	<input type="checkbox"/> Minor revision
<input type="checkbox"/> Grade E (Poor)		<input type="checkbox"/> Existed	<input type="checkbox"/> Major revision
		<input type="checkbox"/> No records	

## COMMENTS TO AUTHORS

The abstract's grammar is poor with the wrong verb tense used throughout. The next portion of a case report should be the introduction and not a core tip. In the introduction again there is grammar problems that need to be addressed with poor sentence structure and verb tense usage. The case report portion should be as follows: First paragraph: HPI, including pmhx, surge hx and meds. second paragraph: PE Third paragraph: labs, CT, US findings. Do you have the US images because it would be a good image to include in the case report. Once again there is poor grammar throughout this section. In the discussion should not use the words "we", "us" or "ours". Once again the grammar is poor but the content is very well versed. Could you comment on how many cases are reported in the literature and if there are only a handful could you represent this in a figure Figure 1 needs to be better cropped to remove all identifiers.

## COMMENTS TO AUTHORS

Interesting case Discussion is too extensive, it must be more specific, focus in colon IPT and intussusception. Important describe pathology and frequency that causes colo-colic intussusception. I would like to know why in this case the intussusception was ileo-cecal when the IPT found in ascending colon. I'll expect find colo-colic intussusception.
