

We would like to thank the reviewers and the editor for the helpful comments for our manuscript entitled “Atlantoaxial Rotatory Displacement in Children”.

Reviewer #2281177

In results section, authors wrote "while 74% were classified as muscular torticollis (45%) or fell within the diagnostic grey zone (28%)", 45% and 28% are 73%. Please authors revise this.

**This change has been made in the results section of the abstract**

Reviewer #505859

The article is "densely" written but is a valuable contribution. In "summary of background data," change the "to" after "accepted" to "for"

**This has been revised**
