Basic Study

Pathogenicity of a currently circulating Chinese variant Pseudorabies virus in Pigs

Qing-Yuan Yang, Zhe Sun, Fei-Fei Tan, Ling-Hua Guo, Yu-Zhou Wang, Juan Wang, Zhi-Yan Wang, Li-Lin Wang, Xiang-Dong Li, Yan Xiao, Ke-Gong Tian

Abstract

AIM: To test the pathogenicity of a PRV variant HN1201 and compare the pathogenicity of it with a classical PRV Fa strain.

METHODS: The pathogenicity of a new-emerging PRV variant HN1201 was evaluated by different inoculating routes, virus load, and age of pigs. The classical PRV Fa strain was then used to compare with HN1201 about the pathogenicity. Clinical symptoms
