## SPECIFIC COMMENTS TO AUTHORS

Authors reported a rare case about an inverted Y ureteral duplication with ectopic ureter and multiple urinary calculi. STATUS: ACCETTABLE FOR PUBBLICATION PENDING MAJOR REVISIONS General considerations: This is a CASE REPORT article. The work is interesting, the paper is very well-written but it is certainly not the first in the literature about this topic. Abstract: the abstract appropriately summarize the manuscript without discrepancies between the abstract and the remainder of the manuscript. Keywords: adequate. Reference: adequate. Paper On some aspects, the authors should address: 1)I believe it is necessary to define in the introduction paragraph the concepts of ureteral malformations, ureteral duplicity and ureteral ectopia. What are? Please, specify the possible associations between these in order to allow an initial schematization to readers. 2)You wrote: "A CTU revealed that the middle of the right ureter was divided into two branches, one descending to the bladder and the other descending to the vicinity of the right seminal vesicle, suggesting duplication of ureteral malformation". Where does the ectopic ureter discharge? You have to specify it. 3)Was an ultrasound examination performed? If so, show the US images. 4)Have you considered the possibility of using retrograde ultrasound contrast agent? Even if you haven't used it, a short discussion is needed. A description of the usefulness of the retrograde US contrast agent and physical principles of CEUS can be found in the following articles, which you must discuss and cite: -Usawachintachit M, Tzou DT, Mongan J, Taguchi K, Weinstein S, Chi T. Feasibility of Retrograde Ureteral Contrast Injection to Guide Ultrasonographic Percutaneous Renal Access in the Nondilated Collecting System. J Endourol. 2017 Feb;31(2):129-134. doi: 10.1089/end.2016.0693. Epub

2016 Nov 30. PMID: 27809568; PMCID: PMC5312625. -Corvino A, Catalano O, Corvino F, Sandomenico F, Petrillo A. Diagnostic Performance and Confidence of Contrast-Enhanced Ultrasound in the Differential Diagnosis of Cystic and Cysticlike Liver Lesions. *AJR Am J Roentgenol* 2017;209(3):W119-W127. doi: 10.2214/AJR.16.17062. Epub 2017 Jun 22. Figures: good. Why don't you add TC reconstructions in MPR or VR? Add US images.

### **SPECIFIC COMMENTS TO AUTHORS**

The authors reported a rare case of inverted Y duplication ureteral anomaly in a male adult suffering pain due to multiple urinary calculi. This case was properly diagnosed. Although these observations are appropriate, they are rather limited and do not justify publication as shown below. 1. The authors made discussions in various points of view, such as the embryology and clinical diagnostic and therapeutic managements. However, there are already several publications combined with good discussions, that were referred in this case report. This was "Urology. 2019;127:124-126". This manuscript shows nothing new, therefore, it cannot satisfy our journal readers, unfortunately. 2. It can be suggested to the authors to make a case report about this case after a long-term follow-up, since the patient refused the surgical treatment. It will make a case report increase the significance of this case how this malformation affects the patient's daily activities.
