COMMENTS TO AUTHORS

Tatyana et al describe the usage Dabigatran etexilate for the liver transplant patient with primary antiphospholipid syndrome and Budd-Chiari Syndrome. The authors stated that this is the first report in which the Dabigatran etexilate was administered for the liver transplant patient. But there were only a few descriptions on the drug of Dabigatran etexilate in discussion. It is unclear what authors eager to assert. The description was desultory and should be much more compacted.

COMMENTS TO AUTHORS

Case report well prepared. I think, This case report can open new horizons the Dabigatran etexilate for use of thrombophilic disorders. If a few letters error corrected. Abstract in the fourth line Buddy-Chiari instead of Budd-Chiari should be written. I think, it can publish.
