COMMENTS TO AUTHORS

The author presents a review regarding breast cancer prevention by screening and/or early detection in low-and middle-income countries. First of all, the author should clarify which countries are considered to be low- and middle-income as well as high income countries for this review. Only this will ensure that the readership can distinguish the meaning and interpretation of the reviewed data. I can only recommend a tremendous revision with the help of a native speaker prior to accepting the manuscript for another review. Please find suggestions for the beginning of the introduction and some heading. Introduction: 1. "That being said, BC is also the primary cause of cancer death among women worldwide accounting for about 375,000 deaths in 2000 [1]." Author should change...That being said to something like: Moreover,... 2. "However, the incidence of BC is on the rise in all parts of the world, be it HICs or LMICs [2], with higher rates of increase observed in LMICs [3]." Author should change the sentence to something like: However, the incidence of BC is rising in all parts of the world whether in HICs or LMICs but having higher increase of incidence in LMICs. 3. "In HICs, due to concerted efforts through last many decades, screening and early detection of BC has been well-established." Change to: Screening and early detection of BC has been well-established in HICs due to coordinated efforts over the last decades. Page 6: STATUS OF BREAST CANCER PREVENTION IN LMICs - THE REAL That is an awkward heading. Please change it to a more meaningful heading. What is real? Page 11: POSSIBLE IMPROVEMENTS IN BREAST CANCER PREVENTION IN LMICs UNDER PRESENT CIRCUMSTANCES - THE ALMOST REAL Same applies as for heading on page 6. Page 15: FUTURE REQUIREMENTS AND POSSIBILITIES FOR BREAST CANCER PREVENTION IN LMICs - THE SURREAL Same applies as for heading on page 6.

COMMENTS TO AUTHORS

The manuscript " Preventing breast cancer in low- and middle-income countries (LMICs) via screening and/or early detection: differentiating the real from the surreal" by Dey S is a review article for the implementation of population level programs for screening or early detection of breast cancer in low income country. This article should be accepted for publication.
