COMMENTS TO AUTHORS

This is a nice paper but needs a few small adjustments. First, it is not clear that it is a review article. Second, contraindications to pill endoscopy are not discussed. Third, more discussion on what types of things are missed by pill endoscopy for each part of the bowel

COMMENTS TO AUTHORS

You have prepared an article devoted to the actual problem of clinical medicine. The material is presented logically and correctly. Disadvantages The table's titles should be placed under the table's number, similarly - for the figures. I recommend the article for publication considering the remarks removal.
