<input type="checkbox"/> Grade A: Excellent	<input type="checkbox"/> Grade A: Priority publishing	<input type="checkbox"/> Accept
<input type="checkbox"/> Grade B: Very good	<input type="checkbox"/> Grade B: Minor language polishing	<input type="checkbox"/> High priority for publication
<input type="checkbox"/> Grade C: Good	<input type="checkbox"/> Grade C: A great deal of language polishing	<input type="checkbox"/> Revision
<input type="checkbox"/> Grade D: Fair	<input type="checkbox"/> Grade D: Rejected	<input type="checkbox"/> Rejection
<input type="checkbox"/> Grade E: Poor		

### JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

This reviewer would agree with the other reviewers on their decisions. The authors have properly addressed the comments from the reviewers, although there still exist needs for further improvement as listed below. 1) To better reflect the paper contents, the title of this report can be slightly modified as "Towards automated calculation of evidence-based clinical scores", because their work appeared to be an ongoing effort. 2) Please correct a few typo-errors such as in Core tip on page 5: importance instead of important; and in Applications on page 12 (bottom): automate instead of automated. 3) In Innovations and breakthroughs on page 12: it is better modified as "This study is a comprehensive assessment of importance of automating calculation of clinical scores in the inpatient setting." , to be more objective.
